Internet Filtering

As part of our on-going IT systems upgrade, we now have more ability to secure our network. Part of that security involves monitoring websites that anyone on our network visit, and blocking (filtering) certain websites that don't meet a certain standard. We have turned off all but the security categories for the filtering, so only websites known to include malicious code or other potential exploits should be blocked. It is important for us to protect our network, as well as any potential liability we may face. If a website is blocked, you will either get a "Request denied by WatchGuard HTTP proxy" or an "The site can't be reached" error. If you do get either of these errors but think the website is safe, please email Paul at pdickson@rembrandtliving.org.au with the address of the website, and he will investigate and let you know the outcome

Nurse Call System

The new nurse call system is live now. If you have any issues with the new system, or if you have any of the old nurse call equipment, please let staff know.
