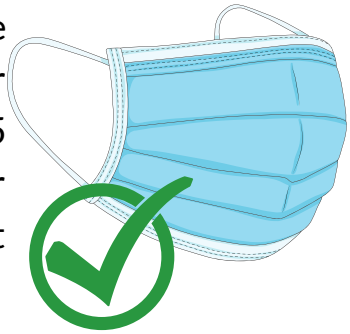
REMBRANDT COURT - COVID MASK UPDATE



We are excited to announce that effective from 12.01am, Monday 17th October Rembrandt Living will move from N95 masks and shields **to surgical masks only** for all staff and visitors, in line with current industry recommendations.

We will however continue to require all staff and visitors to RAT test every 48 hours as a way of minimising the risk of transmission should a staff or visitor be asymptomatic. RAT 's will continue to be available via reception staff and surgical masks will be in key locations around the facility.

Over the coming weeks as suggested during yesterday's SA Health press conference, Rembrandt Living will revise our position on our COVID safe practices and send out communication advising what our new normal will look like.

We will continue to monitor South Australia's COVID numbers and our local community and will adjust PPE levels accordingly if needed.

We hope to not have to reverse this decision however we reserve this right, as it is our priority to ensure the heath and safety of all our residents, staff and visitors.

We thank everyone for their ongoing support for our covid strategies, everyone's high infection control standards and flexibility when our processes change at short notice.

As always if you have any questions, please do not hesitate to contact us on info@rembrandtliving.org.au or 8198 0300.

VIRTUAL CARE SERVICE AT REMBRANDT COURT

As many of you would know the South Australian Health System is under pressure and in particular the SA Ambulance Service wait times and ramping continue to have a significant impact on our community. Rembrandt are pleased to announce we have registered to utilise a new service that will assist in reducing the need for our residents to be transferred to hospital following an acute episode, where their regular GP is unable to attend. Please be reassured that if your loved one needs medical treatment only available in a hospital setting this will be facilitated, however with the support of Virtual Care Service, offered by SA Health our clinical team will provide the necessary clinical treatment and care on site guided by a multidisciplinary team, including doctors, nurses and paramedics, to enable care in place where possible via telehealth.

This will significantly improve resident care outcomes, most importantly we, like you I am sure, would rather see a resident remain in their home, a familiar setting surrounded by people they know, than sit for potentially hours in either a hospital emergency department or worse in the back of an ambulance, ramping. Please see attached the flyer (page six) with additional information about this upcoming service.

TIS THE SEASON - CHRISTMAS GOODIES

Christmas goodies are now on sale in the Café at Rembrandt Court. Please see our helpful café staff if you would like to order any particular Christmas or Sintaklaas products.

RESIDENT'S BIRTHDAYS

Jeff Evans - 20th October

RESIDENT'S MEETING

Wednesday 12th October 2022, seven residents and two staff members attended:

- Residents and staff had a very productive conversation about the newly implemented SA Virtual Care Service government scheme - **please see page six for more important information on the service.**
- Residents and staff had a conversation about nurse training and the importance of buddy shifts and the new mentor program.
- The live music in Daffodil House (Wednesday,12th Oct) was nice. Many thanks to the performers.
- Residents would like to thank Ryan and Paul for their hard work.

virtual care service

Government of South Australia
SA Health

Bringing emergency care to Aged Care residents

The SA Virtual Care Service provides prompt and friendly attention for the emergency health requirements of Aged Care residents.

Residents that may otherwise go to an emergency department for assessment, can now receive that consultation in the comfort of their residence. We provide personalised advice, treatment and coordination involving the resident, their family and carers in decision-making for health care options.

Our individualised service can coordinate the most appropriate pathway to care, often supporting people to stay in their residence or arranging care in their local community. Virtual care is delivered by senior medical, nursing and paramedic staff working together to provide health navigation and virtual clinical consultation.

SA Virtual Care Service provides:

- Timely, senior and individualised clinical services that place the resident at the centre of their care
- Multidisciplinary team, including doctors, nurses and paramedics, to enable care in place where possible
- Visibility of appropriate care pathways in the community, delivering connected and high quality healthcare.

How does it work?

Your facility care team will use a smart phone or tablet to link with a video call to our team, who will then provide a consultation with our senior clinicians. We will make decisions together with you, your family and your facility care team.

What are the advantages?

Residents receive an ED consultation in place at their facility and in most cases when appropriate, will be able to receive care at your facility or in their local community without going to hospital. We provide many care options that are tailored to your needs and preferences.

What about after-care?

Our team can arrange follow up with appropriate clinicians, including appointments and prescriptions.

Who is part of the Virtual Care team?

Our doctor, nursing and paramedic team are qualified and senior staff from your emergency department, SA Ambulance Service and local health networks.

Are there any costs?

There are no costs for the virtual consult although after-care and pharmacy may incur an out of pocket expense.
